

Great news at last! - Following the easing of restrictions, socially distant RaceRunning sessions resumed mid-April. We were delighted to secure a grant from the “Enabling Neighbourhoods and Communities Fund” to fund offsite storage for the next year. This allowed us to make our current cramped onsite storage covid compliant by removing spare equipment. We phased the return of our athletes to be able to make adjustments to bike set up as required. We were very aware that the younger ones would have grown quite a lot in the last year, which was definitely the case. The weather has not been kind to us but it is wonderful to see RaceRunners back on the track.

## Kiltwalk 2021

The ACE Kiltwalkers – otherwise known as Laura, Sean, Caity & Margaret successfully took part in the 2021 virtual Kiltwalk and raised the amazing sum of £1,869.45 for ACE RaceRunning. Thank you to all those that supported them and thank you very much to them for taking on the challenge for ACE!

## RaceRunning gets a new name! – Frame Running

We were delighted to hear that World Para-Athletics has approved the new classification structure for RaceRunning. The classification system is the result of 5 years of hard work by CPISRA – the Cerebral Palsy International Sport and Recreation Association (which our own Peter Drysdale was President of between 2016 and 2020) - and the research team at Edinburgh & Queen Margaret Universities without whom this landmark could not have been achieved. Indeed, some of our athletes took part in research which contributed to their work.

Two new classes T71 & T72, will be adopted into the WPA Classification Rules and Regulations post-Tokyo Paralympics subject to final approval and the name will change from RaceRunning to Frame Running.
